

DIVOT BAG

Now that seeded divots are no longer classed as “ground under repair”, S.G.U. ruling from last year, we are introducing a Divot Bag Scheme for all players. We are asking that you collect your Divot Bag from Pro-Shop before commencing your round. There will be a container of divot mix to fill your bag, and instead of replacing any divot, will you please fill the divot hole with mixture, then firm it down with your foot, before discarding the actual divot into the heavier rough.

As you go through the gates at the 5th and 12th holes there will be another container to enable you to re-fill your bag. Please only use this for fairway repairs as the Par 3’s have divot mix boxes on them.

If all those members and visitors who participate in this scheme repair their own divot, plus one other, just the same as our ongoing pitch mark repair scheme, then we will indeed have a course to be proud of. Those members who cannot be bothered, or, say “I don’t take divots”, or, “I don’t make pitch marks”, believing it to be someone else’s job, really do not deserve as good a course as we have.
